Table of Contents

Impairment of Mining Assets

In 2004 and 2003, the Company recorded additional Empire impairment charges of \$5.8 million and \$2.6 million, respectively, for current years' fixed asset additions. Empire's long-lived assets were impaired in 2002. Approximately \$2.2 million of the 2004 Empire fixed asset additions were related to an increase in the asset retirement obligation reflecting a one year decrease in the estimated mine life due to a change in annual production levels.

Administrative, Selling and General Expenses

Administrative, selling and general expenses in 2004 were \$33.1 million, an increase of \$8.0 million from 2003. The increase pr

| Michigan mines, an equipment outage at the | he Tilden operations in | Michigan in December | 2003, and th | e impact of the de | ecreased U.S. exchar | ge rate with Ca | nada. |

Increased energy rates resulted in an approximate \$17 million aggregate increase in costs in 2003 versus 2002. Similarly, increases in pension expense (excluding restructuring charges) per ton of production accounted for a cost increase in 2003 versus 2002 of more than \$8 million, and higher medical costs (including OPEB increases) per ton of production contributed almost \$5 million to the cost increase. The pension and OPEB increases are net of approximately \$7 million of pon pre

Notes to Consolidated Financial Statements

Two-for-One " â

Cleveland-Cliffs Inc and Consolidated Subsidiaries

Notes to Consolidated Financial Statements — (Continued)

Our rationale for delivering iron ore products to customers in advance of payment for the products is to more closely relate timing of payment by customers to consumption, thereby providing additional liquidity to our customers. Title and risk of loss do not pass to the customer until payment for the pellets is received. This is a revenue recognition practice utilized to reduce our financial risk to customer insolvency. This practice is not believed to be widely used throughout the balance of the industry.

Revenue is recognized on the sale of services when the services are performed.

Where we are joint venture participants in the ownership of a mine, our contracts entitle us to receive royalties and management fees, which we earn as the pellets are produced.

Business Risk: The major business risk faced by the Company, as it increases its merchant position, is lower customer consumption of iron ore from the Company's mines, which may result from competition from other iron ore suppliers; increased use of iron ore substitutes, including imported semi-finished steel; customers rationalization or financial failure; or decreased North American steel production, resulting from increased imports or lower steel consumption. The Company's sales are concentrated with a relatively few number of customers. Unmitigated loss of sales would have a greater impact on operating results and r wenandô the ri frô'

Reclassifications: Certain prior year amounts have been reclassified to conform to current year classifications.

Accounting and Disclosure Changes: In December 2004, the Financial Accounting Standard Board ("FASB") issued SFAS No. 153, "Exchange of Nonmonetary Assets an amendment of APB Opinion No. 29." SFAS No. 153 eliminates the exception from fair value measurement for nonmonetary exchanges of similar productive assets and replaces it with an exception for exchanges that do not have commercial substance. The Statement is effective for nonmonetary exchanges occurring in fiscal periods to express the productive assets and replaces it with an exception for exchanges that do not have commercial substance. The Statement is effective for nonmonetary exchanges occurring in fiscal periods to express the productive assets and replaces it with an exception for exchanges that do not have commercial substance.
